Chapter 7 - Electrical power supplies

7.1

The electrical power supplies in a Class INF 1 ship shall be to the satisfaction of the Administration.

7.2

In Class INF 2 and 3 ships:

.1 an alternative source of electrical power, complying with the requirements of the international standards acceptable to the Organization, shall be provided so that damage involving the main supply would not affect the alternative source; and

.2 the power available from the alternative source shall be sufficient to supply the following services for at least 36 hours:

.2.1 the equipment provided for the flooding and cooling arrangements referred to in 3.2.3 and 4.1; and

.2.2 all emergency services required by the Convention.

7.3

In a Class INF 3 ship, the alternative source referred to in 7.2.1 shall be located outside the extent of any damage envisaged under chapter 2.
